| Lageroppervlakte (cm??) | 0.38                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Omschrijving (EN)       | <p>JWIS Roller chains are characterised by an above-average service life due to excellent wear resistance, high consistency, matchless precision and a considerably higher breaking strength and fatigue strength than required by ISO standard. All iwis chains are pre-stretched and are provided with a highly efficient initial lubrication.</p> <p>Highlights:</p> <ul style="list-style-type: none"> <li>Only high-quality heat-treated and case-hardened steel is used with stringent specifications for materials analysis, tolerances and surface quality</li> <li>Each chain part is manufactured a million times daily to the same precision and is monitored using SPC (statistical process control)</li> <li>All chain parts are heat-treated, in some cases using special processes to optimize quality characteristics</li> <li>Modern production technologies ensure consistent geometry and superior surface quality</li> <li>Chains are checked for dimensional accuracy, length tolerance and flexibility, plus for the press fit joins on pins, outer plates and bush, and inner plate</li> <li>Our high quality assurance standards comply with the requirements of ISO 9001:2006</li> <li>For special applications: surface coatings, special lubricants, special materials (e.g. corrosion-resistant)</li> </ul> |
| Merk                    | IWIS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
