| Omschrijving (EN) | <p>These chains were the result of various specific customer requests, such as a demand for increased load capacity without additional space or chains designed to fit in a restricted installation space. Some versions were originally derived from bicycle or motorcycle chains. Their specifications are as diverse as their applications. ELITE roller chains have a high wear resistance and significantly higher fatigue strength than the standard requires. The right choice for industrial applications: robust and reliable. All ELITE transmission roller chains are highly pre-tensioned and treated with our special additive chain oil eliDUR+, a high-tech initial lubricant. Non-drip eliDUR+ offers not only the added advantage of improved running characteristics, but also provides better corrosion protection. Highlights Works standard chains are supplied with initial lubricationAll chains are pre-stretched with 30 ??? 50% of breaking strengthLength tolerances: 0.15% of nominal lengthHigher breaking strengthsSeamless, cold-extruded, shot-blasted rollers with extremely regular wall thickness</p> |
