Omschrijving (EN)	The wrapped classical section Hi-Power??? V-belt has a long reputation for reliability on agricultural and industrial applications. The arched top of the Hi-Power??? belt provides superior strength to prevent "dishing" and distortion of the tensile section. The cords are properly aligned, each of them carrying its full share of the load. Arched top, concave sidewalls and rounded corners provide uniform tensile loading and uniform pulley sidewall contact for excellent belt service life and reduced pulley wear. The vulcanised Flex-bonded tensile cords provide superior resistance to tensile and flexing forces, fatigue and shock loads. The Flex Weave oil and heat resistant cover protects the belt core from the toughest environments.
