<b>Omschrijving (EN)</b>	PowerGrip??? GT???3 belts are made of a highly advanced combination of materials designed to reduce both initial and operating costs. The entire PowerGrip??? GT???3 belt range is suited both for new drive designs as for performance upgrades on existing drives. It has two times the rating of competitive RPP??? belts and its predecessors PowerGrip??? GT??? and HTD???, with the largest selection of belts and sprockets in the industry. The 2MGT, 3MGT and 5MGT pitches are ideal for compact drives on hand tools, business machines, domestic appliances and high precision servomotor drives. Technically advanced compound with fibre glass tensile cord. Elastomeric backing protects the cords from environmental pollution and frictional wear. Low friction nylon facing protects the tooth surface against wear.
