<b>Omschrijving (EN)</b>	Long-length PowerGrip <sup>®</sup> GT <sup>®</sup> linear belting is a comprehensive range of open-ended belts which can be easily cut to the required length. Long Length open-end synchronous belts are especially suited for linear movements (automated doors, warehouse conveyors and lifts), accurate positioning (machine tools, x-y co-ordinate machines) and reversal drives (computers, printers and office equipment). Length stability due to the use of high modulus tensile members. Elastomeric body provides protection against grime, grease, oil and moisture. Nylon tooth facing provides a durable wear surface for long service life.
