Omschrijving (EN)	The Gates® Super HC™ V-belt combines the strength of a wrapped belt construction with the economies of a narrow section V-belt. It transmits more power in a given space and allows more compact drive design than classical section V-belts. In short, it offers you more power and considerably reduces the space needed. This significantly cuts the overall drive cost. Super HC™ V-belts also have exclusive Gates construction features for longer life on your drives! Meets RMA oil and heat resistant standards and static conductivity requirements. Up to 300% capacity increase over classical belts. Temperature Range: -30°C to +60°C (-22°F to +140°F).
