Omschrijving (EN)	Gates' Predator™ PowerBand™ belt design offers a solution for drives where single belts vibrate, turn over or jump off the pulleys. It consists of several V-belts joined together by a permanent, high-strength tie band allowing the belts to work together as one unit. The Predator™ Powerband™ belt is especially designed for demanding applications and harsh environments and offers a high resistance to vibration. Specifically designed for high-demand applications, the extra heavy-duty belt construction provides extraordinary high impact strength, capacity and wear resistance. Aramid Tensile Cords combine limited stretch with extraordinary strength and durability that is pound-for-pound stronger than steel. Bareback Cover resists debris and allows the belt to slip under extreme shock load conditions, reducing heat build-up and prolonging belt life. Multiple layer Tie Band provides excellent lateral rigidity to prevent belts from turning over or from coming off of the drive.
