Omschrijving (EN)	Gates® PowerGrip® Twin Power® Timing Belts are suitable for all industrial serpentine applications that require rotation reversal in some driven shafts. Twin Power® belts have precision-formed elastomeric teeth on both sides to provide high-loading capacity synchronisation from both driving surfaces. Due to its double and directly opposite teeth, Twin Power® synchronous belts ensure high loading capacity on contra-rotating drives and ensure smooth running and high flexibility. Gates® PowerGrip® Twin Power® belts are designed to perform at high speeds and in extreme temperatures, with a larger tooth profile for increased performance capacity. Fiberglass tensile cord provides high strength, excellent flex life and high resistance to elongation. Neoprene body provides protection against grime, grease, oil and moisture. Belt capacity is equal to standard single-sided PowerGrip® timing belts.
