Omschrijving (EN)	Gates® PowerGrip™ HTD™ Twin Power™ synchronous belts are designed to perform at high speeds and in extreme temperatures, with a larger tooth profile for increased performance capacity. They have nylon facing on both tooth sides to provide equal high load carrying capabilities between the sides. Fibreglass tensile cords provide high strength durability, excellent flex life, and high resistance to elongation. Neoprene body resists against wear from grime, grease, oil and moisture. Temperature Range: -30°C to +100°C (-22°F to +212°F).
